TR FOODZONE

Campus Canteen Food Ordering Website

BY THE OWNER - TAMIL R

Project identity

TR FOODZONE is presented through the "Campus Bites" student-canteen interface.

1. Project Introduction

TR FOODZONE - owned by Tamil R

TR FOODZONE is a web-based campus food-ordering concept.

The live interface is branded as “Campus Bites”.

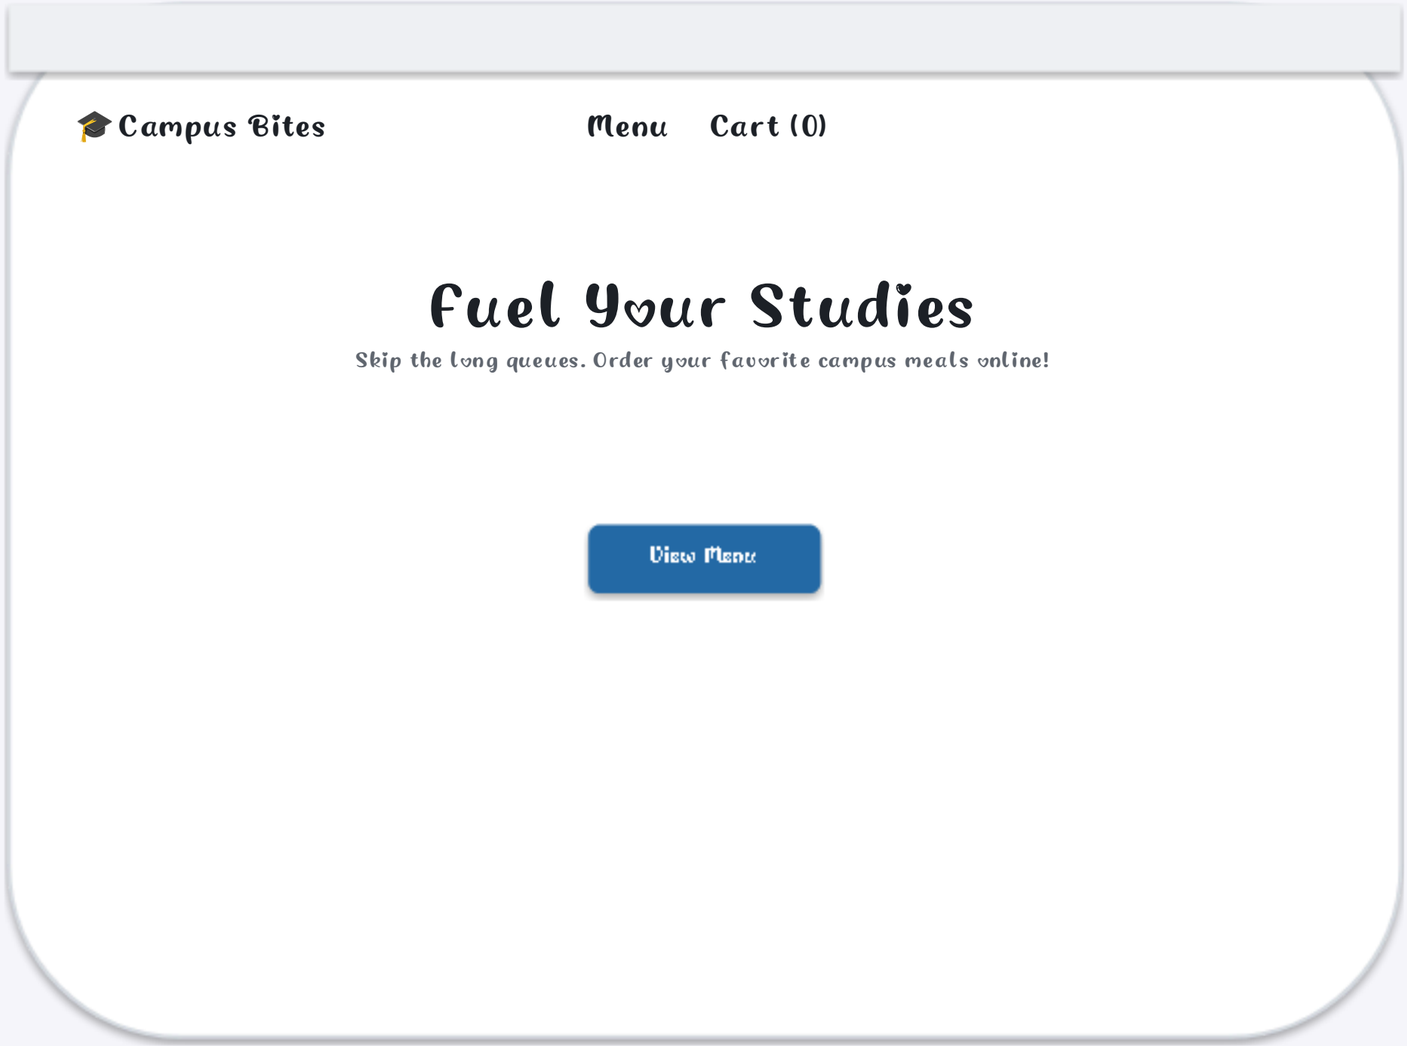

The website is designed around students and their limited break time.

The main goal is to simplify food discovery, order review and pickup planning.

Core flow: Browse → Select → Cart → Details → Pickup → Place Order.

2. Live Website - Home Page

Website view based on the live page

Header

🎓 Campus Bites · Menu · Cart (0)

Hero

"Fuel Your Studies"

Value message

Skip the long queues and order campus meals online.

Action

View Menu

3. Home Page – Feature Explanation

Brand identity
"Campus Bites" clearly identifies the campus food service.

Main message
"Fuel Your Studies" connects the service to student life.

Value proposition
The site promotes online ordering as an alternative to long queues.

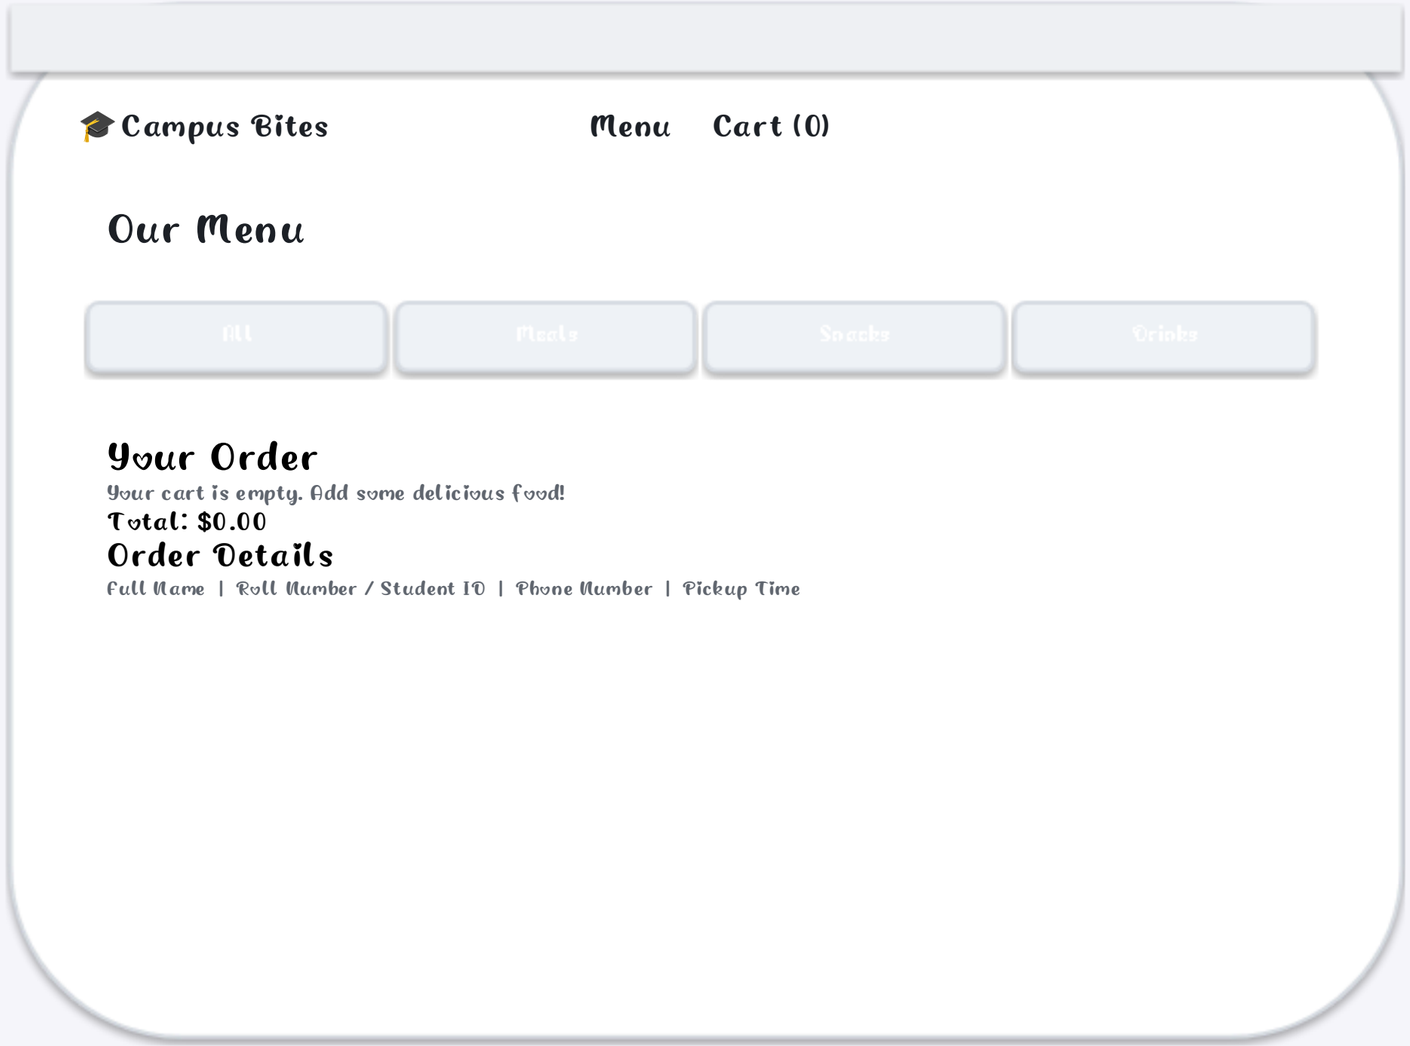

Menu and Cart are visible in the top navigation.

View Menu is the main call-to-action.

The footer identifies the service as "Campus Bites Canteen" and says it is built for students.

4. Menu Section

Food discovery and category filtering

ALL

Shows the complete menu.

MEALS

Focuses on meal items.

SNACKS

Focuses on snack items.

DRINKS

Focuses on beverages.

5. Cart / Your Order

Review stage before submission

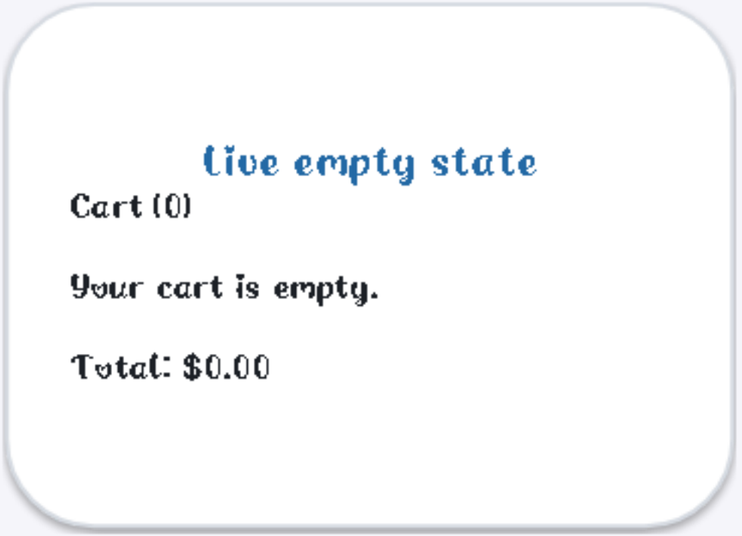

The top navigation shows the current cart count.

The order area displays the current selection.

The total amount is displayed.

The live empty state says: “Your cart is empty. Add some delicious food!”

The current empty-cart total shown by the site is $0.00.

6. Order Details Form

Student information required for the order

Full Name

Example placeholder: John Doe

Roll Number / Student ID

Example placeholder: CS2026-045

Phone Number

Example placeholder: 123-456-7890

Pickup Time

Select field

7. Place Order

Final interaction in the current page

Complete the order details.

Choose a pickup time.

Review the order and total.

Select Place Order to submit the intended order.

FINAL ACTION

PLACE ORDER

User goal

Submit the selected food order with the required student information.

8. Complete Website Workflow

Core user journey

Open website → browse food → filter category → manage cart → enter details → select pickup → place order

9. UI / UX Design Analysis

Visual hierarchy
Brand → hero → menu → order

Simple navigation
Menu and Cart remain easy to find

Clear categories
All, Meals, Snacks and Drinks

Form clarity
Each order field has a specific label

Action clarity
View Menu and Place Order are direct actions

10. Technologies Used

Technical explanation for the project

HTML5
Creates the page structure, navigation, menu controls and order form.

CSS3
Controls layout, spacing, typography, cards, buttons and visual styling.

JavaScript
Provides interactive menu, cart, totals and form behaviour.

GitHub Pages
Hosts the supplied live website.

Development
HTML/CSS/JS can be edited using a code editor such as VS Code.

11. Functional Requirements

Requirement 1
Menu is organized by category.

Requirement 2
Users can select food items.

Requirement 3
Cart reflects the current order and total.

Requirement 4
Student details can be entered.

Requirement 5
Pickup time can be selected.

Requirement 6
Place Order provides a clear submission action.

12. Benefits & Future Scope

Current benefits

- Easy menu browsing
- Category filtering
- Cart and total visibility
- Student information collection
- Pickup-time selection
- Simple end-to-end flow

Possible future enhancements

- Online payment
- Student login
- Order confirmation
- Live order tracking
- Order history
- Admin/canteen dashboard
- Live stock availability
- QR pickup
- Ratings and feedback

CONCLUSION

TR FOODZONE – BY TAMIL R

The website provides a focused campus food-ordering experience through the Campus Bites interface. It connects menu discovery, category filtering, cart review, student details, pickup time and order placement into one clear journey.
